Archie, your code is exceptional!

It is indeed a paragon of algorithmic sublimity.

```
: throw dup if  
catch-rp @ rp!  
r> catch-rp !  
r> swap >r sp!  
drop r>  
else drop then ;
```

NO. YOUR CODE IS CRAP.

```
: throw dup  
catch-rp  
r> cat  
r> sw  
drop  
else
```

Oh really? And who are you then?

I AM MOANAR-QUEBE. I JUDGE YOUR CODE TO BE UNWORTHY.

```
: throw dup  
catch-rp  
r> cat  
r> sw  
drop  
else
```

I WORK FOR THE CI DIVISION AND I POLICE ALL PULL REQUESTS. NOTHING GETS COMMITTED WITHOUT MY APPROVAL.

```
: throw dup  
catch-rp  
r> cat  
r> sw  
drop  
else
```

I cry foul. This robot has no idea what makes good code. It just checks rules written by preschoolers.

The new policy is to have algorithms check all new code.

But the algorithms are code. Who checks them?

SUBMIT TO YOUR ROBOT OVERLORDS!
